- Responsive Design

### Core Web:

- HTML5
- CSS3
- JavaScript (ES6+)

## Projects

---

**The Indian Exporter** is a B2B marketplace website designed to connect Indian exporters with buyers across the globe. Inspired by platforms like IndiaMART, the website facilitates the listing of export-oriented products and services, allowing users to register as vendors or buyers. Built using WordPress and hosted on Hostinger, this platform leverages widely used plugins such as WooCommerce, Ultimate Member, and Razorpay to offer a complete online business solution.

Vendors can list products, showcase business details, and manage inquiries, while buyers can search listings and send quotation requests through built-in contact forms. The platform aims to simplify business communication and provide a reliable medium for international trade promotion
